Super Ape is unknown. Little is known about his past and he refuses to comment on it. From what little colleagues and journalists were able to coax it comes from a faraway place where the great apes and humans coexist, but for some reason ended leaving there and landed in our world.

This has become a name to protect the most vulnerable despite the initial teasing (and that are still in many cases) has become a media star and a fighter for the rights of animals.

He was associated with a famous model but has never been confirmed.

personality

It is a cheerful and outgoing individual, he seems to be always ready with a joke or a game, but its task is taken very seriously defender.
